Job Description

Job Description

We are seeking a highly motivated individual to join our team as a Field Site Operator at the Carbon Management Canadas (CMC) Newell County Facility, located 20 min outside of Brooks, AB. The Field Site Operator will be responsible for the successful operation and maintenance of our field site, ensuring that our equipment and systems are functioning optimally. The successful candidate will be working in a hybrid position with work mostly outdoors and must be able to work independently while managing their time effectively.

Key Responsibilities:

- Operate, maintain, and troubleshoot equipment and systems at our field site.
- Perform regular maintenance checks, repairs, and calibrations of equipment.
- Maintain accurate records of maintenance activities and ensure compliance with safety and environmental regulations.
- Communicate regularly with the Operations Manager to ensure effective coordination of activities.
- Monitor site conditions and report any safety hazards, environmental concerns, or issues.
- Perform routine administrative tasks such as preparing reports, completing inventory checks, and ordering supplies.
- Support management and interpretation of all data collected at site.

Requirements:

- High school diploma or equivalent
- Previous experience in a similar role, ideally in an industrial or environmental setting
- Strong problem-solving skills and ability to troubleshoot issues with equipment and systems.
- Comfortable working outdoors in various weather conditions and able to lift heavy equipment.
- Excellent communication skills and ability to work collaboratively with a diverse team of stakeholders.

- Basic computer skills and familiarity with Microsoft Office applications.
- Valid driver's license and clean driving record.
- ATV Certification is considered an asset.
- Interest or experience in data management and technical applied research is considered an asset.

This requires the ability to work flexible hours, potentially including some weekends and holidays. The successful candidate will receive competitive compensation and benefits. If you are passionate about working in a dynamic environment, we encourage you to apply for this exciting opportunity.

About CMC

CMC is a national, not-for-profit organization working to develop and deploy emissions reduction solutions and support the Canadian industry. We assist innovators in developing methane monitoring, carbon capture, utilization, and storage (CCUS), and subsurface monitoring technologies, and provide techno-economic analysis to companies, investors, and governments to direct research, development, investment, and policymaking. CMC aims to move solutions more quickly from research to market, thereby growing the Canadian economy, increasing Canada's competitiveness in world markets, and supporting practical, feasible, and economically viable industrial emissions reductions.

CMC is an equal opportunity employer and prohibits discrimination and harassment of any kind. All employment decisions including hiring, promotions, demotions, layoffs or terminations, compensation recruitment and selection for training or professional development are based on business needs, job requirements and individual qualification without regard to race, color, religion or belief, age, physical or mental disability, sex, marital status, ancestry, national origin, citizenship, pregnancy, sexual orientation, or any other characteristic protected by federal, provincial, or municipal law.
